WORK EXPERIENCE

Baltimore Gas & Electric - An Exelon company, USA

Quantitative Analyst (BI & Data Analytics), Python, SQL, A/B Testing, Power BI, Azure, Git, Excel, Databricks July 2024 - Present

- Engineered a unified Telephony, and Customer Care & Billing (CC&B) dataset using **Python (Pandas, NumPy)** and **SQL (CTEs, window functions, aggregations)**, achieving an **86% match rate** and improving data accuracy across **2M+ customer records**.
- Architected call volume forecasting models using **Azure ML Studio**, trained on data from **Microsoft SQL Server**, with prediction stored in **Azure Blob Storage** and visualized in **Power BI**, enabling workforce planning and **reducing late staffing decisions by ~40%**.
- Owned and led a cross-functional initiative to design an executive-level **Power BI dashboard** for the VP of Customer Operations, aggregating **28 KPIs** and eliminating manual reporting for **24 data stewards, saving 48–72 hours per month**.
- Designed and operationalized **DAX-driven** performance dashboards tracking key product and operational metrics (FCR, AHT, volume, capacity), **improving KPI visibility by 25%** and **accelerating identification of underperforming agents by 15%**.
- Automated recurring workflows for the operations management team using **Python scripts** and **Power Automate**, replacing manual processes and **saving ~5–6 hours per week**, while also supporting ongoing **weekly and monthly ad-hoc analytical requests**.

Med-IQ, Inc., USA

Data Analyst Co-op, Python, Looker, SQL, Epic EHR, Apache NiFi, Git, Excel

July 2023 - March 2024

- Conducted in-depth analysis on large-scale EHR and Census datasets with **500K+ patient-level records** using **Python** and **SQL**, applying **Chi-Square tests** and **ANOVA** to uncover disparities in disease prevalence and treatment outcomes, driving statistically significant healthcare insights.
- Built and productionized automated data preprocessing pipelines in **Python (Pandas, NumPy)**, **improving dataset quality and standardization by ~20%** across multiple healthcare data sources.
- Designed and delivered interactive **Looker** dashboards to visualize equity, utilization, and outcome trends, enabling stakeholders to self-serve insights and **reduce ad-hoc analysis requests by ~35%**.
- Optimized ETL workflows using **Apache NiFi** and **SQL**, **reducing pipeline runtime by ~30%** and accelerating delivery of cleaned and analytics-ready healthcare datasets.

CognivAI Solutions, India

Data Analyst, Python (Matplotlib), SQL (PostgreSQL), Tableau, AWS, APIs, Logistic Regression

April 2019 - December 2021

- Ingested, joined, and validated **16M+** transactional records across APIs, credit bureaus, and partner systems using **SQL** and **Python**, improving data completeness and driving a **15% uplift in credit scoring accuracy**.
- Performed exploratory data analysis and feature engineering in **Python (Pandas, Matplotlib)** and applied **Logistic Regression** and **Decision Trees**, **reducing default rates by 18%** and **improving risk stratification accuracy by 12%**.
- Built and maintained real-time **Tableau dashboards** to track credit risk KPIs and alerts, reducing reporting lag by **~45%** and accelerating stakeholder decision-making.
- Optimized **PostgreSQL queries** for large-scale partner data extraction, **improving execution time by ~25%** and enabling faster model refresh cycles.

SKILLS

Programming & Querying: Python (Pandas, NumPy), SQL, R

Tools & Development: Git, GitHub, Jupyter Notebook, PyCharm, Jira

Analytics & Statistics: Hypothesis Testing, A/B Testing, Forecasting, Regression, Classification, Probability & Distributions, Feature Engineering, Statistical Modeling

Machine Learning: Logistic Regression, Random Forests, Decision Trees, Gradient Boosting

Visualization & Reporting Tools: Power BI (DAX), Tableau, Advanced Excel (Pivot Tables, VLOOKUP, Power Query)

Data Engineering & Platforms: Azure, AWS, Databricks, SQL Server, PostgreSQL, MySQL, Data Warehousing, ETL Pipelines

Business & Operational Analytics: Operational Analytics, Workforce & Capacity Analysis, Metrics Definition, Performance Measurement, Process Improvement, Root Cause Analysis

Soft Skills: Cross-Functional Collaboration, Stakeholder Management, Executive Reporting, Requirements Gathering, Translating Business Needs into Data Solutions, Product Analytics, Metric Definition, Experiment Design, Funnel Analysis, Decision Science

EDUCATION

University of Maryland, Baltimore County

Dec 2023

Masters of Science (M.S.) Information Systems | **Specialization** : Data Science

GPA: 3.8 / 4.0

Related Coursework: Data Mining, Machine Learning, Data Warehousing, Big Data Architecture, Data Visualization, Statistical Methods, Advanced Python Programming

Savitribai Phule Pune University, Vishwakarma Institute of Information Technology

May 2020

Bachelor of Technology in Electronics and Telecommunication

GPA: 3.9 / 4.0
